**B.Sc. (Microbiology) IIIrd Year Examination,
May-2019**

FOOD AND DAIRY MICROBIOLOGY

(B-303)

(B.Sc.-Micro.)

*despise
despised*

Time : 3 Hrs.]

[M.M. : 50

Note :- Attempt any *five* questions. All questions carry equal marks.

1. Discuss the importance of canned foods. List a few bacteria that may usually be present in canned food items. 10
2. Discuss different methods of food preservation. 10
3. Discuss at least *four* food borne disease, their symptoms, pathogens and methods of control. 10

NA-337

*beverages
beverage*

(1)

Turn Over

4. Discuss different kinds of food spoilage caused by micro-organisms.

10

5. Write short notes on any *two* of the following :

(i) Butter milk preparation

(ii) Pasteurisation

(iii) Cheese preparation

5+5=10

6. Write short notes on any *two* of the following :

(i) Dehydrated foods

(ii) Microbes in meat

(iii) Bacterial contamination of dairy products

5+5=10

7. Give a comprehensive account of the micro-organisms responsible for the spoilage of poultry and meats.

10

8. Write short notes on any *two* of the following :

(i) Bread making

(ii) Idli preparation

(iii) Fermented vegetables

5+5=10

9. Discuss the role of different types of microbes associated with spoilage of milk and milk products. 10
10. What are single cell proteins ? Discuss the methods of production of single cell proteins. 10

3506 (CV)
B.Sc. (Microbiology) IIIrd Year
Examination, June-2020
FOOD AND DAIRY MICROBIOLOGY
(B-303)

(B.Sc.-Micro.)

Time : Two Hours]

[Maximum Marks : 50

Note : Attempt any **four** questions. **All** questions carry equal marks.

1. Discuss different methods of "Food Preservation".
2. What is food poisoning? Describe the diseases caused due to food poisoning.
3. Explain the role of micro-organisms in preparation of fermented foods.
4. Write an essay on the production of alcoholic beverages.

P.T.O.

5. Give a detailed account of important micro-organisms of meats, poultry and vegetables.
6. Write short notes on any **two** :
 - (a) Yeasts
 - (b) Penicillium
 - (c) Dehydrated foods
7. Write short notes on any **two** :
 - (a) Single cell proteins
 - (b) Leavening of bread
 - (c) Fermented vegetables
8. Write short notes on any **two** :
 - (a) Synthetic milk
 - (b) Pasteurization
 - (c) Yoghurt preparation
9. What do you understand by milk spoilage? Give a comprehensive account of character and laboratory examination of fermented dairy products, butter milk and cheese.

3506(CV)/2

10. Write short notes on any **two** :
 - (a) Moulds
 - (b) Salmonella
 - (c) Idli preparation

3506(CV)/3

3506 (CV-II)**B.Sc. (Micro.) Examination,****June-2021****Food and Dairy Microbiology****(B-303)****[B.Sc. (Micro.)]***Time : 1½ Hours**[Maximum Marks : 50]*

Note : Attempt any **two** questions. **All** questions carry equal marks.

1. Discuss the role of different types of bacteria in Dairy industry.
2. Write short notes on any **two** of the following :
 - (i) **Saccharomyces**
 - (ii) **Salmonella**
 - (iii) **Canned meat**

P.T.O.

3. What is food preservation? Discuss physical methods of food preservation.

4. Write short notes on any **two** of the following :

(i) Rhizopus

(ii) Sodium benzoate

(iii) Pasteurization

5. What is food poisoning? Discuss the role of microbes responsible for food poisoning.

6. Write short notes on any **two** of the following :

(i) Refrigeration

(ii) **Clostridium**

(iii) Appertization

7. Define Fermentation. Giving an outline of the process, discuss the process of alcohol production.

8. Write short notes on any **two** of the following :

(i) Single Cell Protein

(ii) South Indian fermented foods

(iii) Bread making

9. Discuss different methods of examination of milk purity.

10. Write short notes on any **two** of the following :

(i) Normal microflora of milk

(ii) Spoilage of milk

(iii) Cheese

FOOD AND DAIRY MICROBIOLOGY

(B-303)

(B.Sc.-Micro.)

Time : Three Hours] [Maximum Marks : 50

Note : Attempt **any five** questions. **All**
questions carry equal marks.

1. Differentiate between food poisoning and intoxication? Explain Intoxication with example. 10
2. Differentiate between Appertization and Pasteurisation. 10

P.T.O.

3. Enlist the general principle of food preservation. 10

4. Give the name of microorganism and the production process involved in the formation of Sauerkraut. 10

5. Describe the procedure of Beer production. 10

6. Name the organism and procedure of following Indian fermented product. 10

7. Write the symptom, food involved and preventive measure of the following food borne disease: 5×2

(a) Salmonella typhi

(b) Bacillus cereus

3506/2

8. Name the spoilage agent and write the characteristics of following food spoilage: 5×2

(a) Stormy fermentation of milk

(b) Ropiness of bread

9. Describe spoilage of canned food. What is the significance of determination of Z, D, and F values in food preservation? 10

10. Explain the mechanism of chemical preservation? Name four chemical preservative used in food preservation? 10

Food and Dairy Microbiology

(B-303)

B.Sc. (Micro)

Time : 3:00 Hours]

[Maximum Marks : 50

Note : Attempt any **five** questions All question carry equal marks.

1. (a) What are food borne disease, and how are they caused? 5

खाद्य जनित बीमारियाँ क्या होती हैं और उनका कैसे कारण होता है?

(a) Describe the common symptoms of food borne illnesses. 5

खाद्य जनित बीमारियों के आम लक्षणों का वर्णन करें।

P.T.O.

2. Discuss the importance of food safety measures in preventing food borne diseases.

खाद्य सुरक्षा मापों के खाद्य जनित बीमारियों को रोकने में महत्व की चर्चा करें। 10

3. Discuss the Importance of Microbiological Safety in Meat Processing.

मांस प्रसंस्करण में माइक्रोबायोलॉजिकल सुरक्षा के महत्व की चर्चा करें। 10

4. Explain the Role of Microorganisms in Dry aging of Meat.

मांस के सूखे पकाने में माइक्रोऑर्गेनिज्मों की भूमिका की व्याख्या करें। 10

5. Examine the Economic Impact of Microorganisms in Meat Production. 10
मांस उत्पादन में माइक्रोऑर्गेनिज्मों के आर्थिक प्रभाव की जांच

6. Explain the Fundamental Principles of Food Preservation. 10

खाद्य संरक्षण के मौलिक सिद्धांतों का विवरण करें।

7. Discuss the Microbial Spoilage of Foods and Its Prevention. 10

खाद्यों की जैविक खराबी और उसकी रोकथाम की चर्चा करें।

8. Examine the Impact of Temperature on Food Preservation. 10

तापमान के खाद्य संरक्षण में प्रभाव की जांच करें।

9. Describe the Role of Packaging in Food Preservation. 10

खाद्य संरक्षण में पैकेजिंग की भूमिका का वर्णन करें।

10. Discuss the Preservation of Foods Using Chemical Methods. 10

रासायनिक विधियों का उपयोग करके खाद्य संरक्षण का वर्णन करें।

FOOD AND DIARY MICROBIOLOGY

(B-303)

[B.Sc. (Micro.)]

Time : Three Hours] [Maximum Marks : 50

Note : Attempt any **five** questions. **All** questions carry equal marks.

1. Discuss the role of microorganism in food.
2. Explain the importance of Yeast in both alcoholic beverages and bread.

P.T.O.

3. What are the main food borne pathogens and how can they controlled?
4. What preventive measure can reduce the risk of food borne diseases?
5. What is microbial fermentation? What role do bacteria in yogurt production?
6. What is preservation? Discuss Pasteurization techniques.
7. What is the causative agent of Botulism & describe the symptoms of food poisoning?
8. Discuss the role of microorganism for the production of cheese.
9. Write economic importance of microorganism in fermented meat products.

10. Discuss the principles of food preservation.
